BEHAVIOR ANALYSIS TECHNOLOGY

## A complete tool

Creation of objectives and programs

Online data collection

Document sharing

Data analysis and visualization

Communication

Graphs ready for your reports

PC – tablet – smartphone

Multilingual

Security

## Its creation

ABA-Assistant was born from fieldwork, intervention, supervision and the reflection of ABA specialists.

Assessing their needs to ensure and improve their interventions led to the creation of this platform.

ABA-Assistant offers a simple and complete solution to collect, visualize and analyze your data.

Automatic graphs and analyses

Data and document sharing

Involvement of users and their families

Coordination and supervision of professionals

Time saving

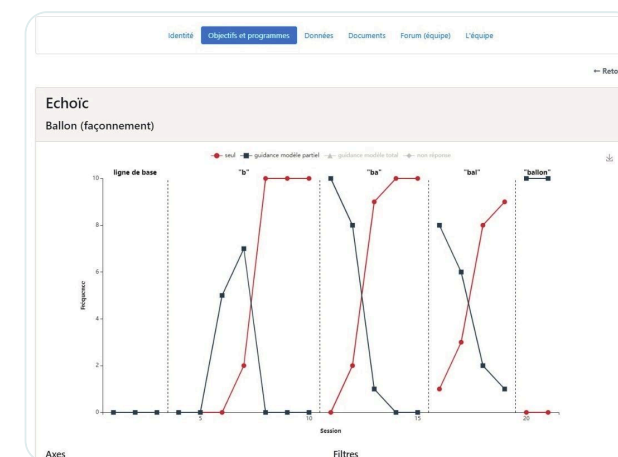

Easier work

## Our team

We are a French company bringing together experienced professionals in behavior analysis and computer science.

Pooling our skills gave us the desire to develop solutions that help professionals, beneficiaries and everyone to collect and analyze data, and to pass on knowledge and skills.
